

Mortgagee Type

Trustee and Loss Payable have been added to the Mort type drop down list in SF012 Supplemental Names.

Print Terrorism Notices With Policies

Terrorism Notices can now be printed out with declarations instead of having to collate them. For detailed instructions on how to set this option see ShortForm Print Terrorism Notices with Decs documentation in INS-eMAN.

LA052 Open Claims Report Update

This report now generates two csv files (found in Prog/ISPO) when it is run:
LA052EXT - shows a list of all open claims, and
LA052EXT1 - lists open claims for the current year only.

MI072 Regulation 154 Report (*NY clients only*) and SF142 NAIC MCAS Report

For these two reports to be accurate, it is critical that all the Policy Status Code fields in the Policy Status Table are properly filled in. Please refer to applicable documents in INS-eMAN for detailed instructions.

ACH Processing

The ACH Processing has been revamped. Some of the change highlights:
Policies are processed only if the ACH date falls within the run range. The AR170 report now identifies the status of policies. AR170 and AR184 totals are now synchronized. Only 1 record (per policy) is written to the bank. You can now select the option to skip/include buckets with a status of billed; and whether to include with next payment all undistributed transaction fees in the policy (regardless of their date), or only those which fall within the run range. For detail instructions see AR PreAuthorized Payments documentation in INS-eMAN.

LA066 Losses by Adjustor Report Update

This report has been modified to accommodate up to 1,000 adjustors in the Adjustor Table.

PW159 Extract Catastrophe Modeling Data

This report has been modified to include an agent number.

Office 365 Email

If you are migrating to Office 365 and are currently using, or want to use INSPRO email, please notify TCCS, so we can make arrangements to install the new email program.
